Interventional Examination Information Bulletin
(January 2015 Edition – for use with 2015 CIPS Examinations)
for Certified Interventional Pain Sonologist (CIPS) Examination

REVIEW Page 9-12 for Examination Description.
Members of the Board of Examination

Chair (2013-2015)
Maarten van Kleef, MD, PhD, FIPP
Maastricht, Limburg, The Netherlands

Vice Chair
Peter Staats, MD, FIPP
New Jersey, USA

Registrar of Examination
Monique Steegers, MD, PhD, FIPP
Malden, The Netherlands

Liaison to WIP
Ricardo Ruiz-Lopez, MD, FIPP
Barcelona, Spain

Philippe Mavrocordatos, MD, FIPP
Lausanne, Switzerland

Milan Stojanovic, MD, FIPP
Massachusetts, USA

Jan Van Zundert, MD, PhD, FIPP
Genk, Belgium

Eric Wilson, Mb, BCh, FIPP
Cape Town, South Africa

Immediate Past Examination Chair
Miles Day, MD, FIPP, DABIPP, DABPM
Lubbock, Texas, USA

Past Examination Chairs
Nagy Mekhail, MD, PhD, FIPP
Cleveland, Ohio USA

Serdar Erdine, MD, FIPP
Istanbul, Turkey

P. Prithvi Raj, MD, DABIPP, FIPP
Cincinnati, OH, USA

INAUGURAL EXAMINERS

Ira Fox, MD, FIPP – USA
Bernhard Moriggl, MD, PhD – AUSTRIA

Samer Narouze, MD, PhD, FIPP – USA
Peter Staats, MD, FIPP – USA
In order to be eligible for the Certification Examination in Interventional Pain Medicine, you must meet the following requirements:

**Requirement 1**

**Licensure**

All licenses you hold to practice medicine must be valid, unrestricted, and current at the time of the examination.

Each applicant must hold a license issued by (a) one of the states of the United States of America or (b) its equivalent in the applicant’s country, state, province, parish, county, or other governmental unit within the applicant’s country.

**Requirement 2**

**Accreditation Council on Graduate Medical Education (ACGME) Approved Residency**

You must have satisfactorily completed a four-year ACGME-accredited residency training program or its equivalent that included pain management. Applicants must submit a chronological list of all completed ACGME training or equivalent (see Page 2 of the application).

**Requirement 3**

**American Board of Medical Specialties (ABMS) Board Certification or Equivalent**

You must demonstrate compliance with either Alternative A or Alternative B, as follow:

**Alternative A:** You must be currently certified by a board accredited by the American Board of Medical Specialties.

**or**

**Alternative B:** You must be currently certified by a board in your country of residence that certifies you as specialist or family practice physician.

1. You must submit documentation of identifiable training in your primary specialty in an ACGME-accredited training program or equivalent. This identifiable training must be equivalent in scope, content, and duration to that received in one of the ACGME-accredited training programs of a board accredited by ABMS.

2. The documentation of your training must include a letter or form signed by the program director of the ACGME-accredited training program or equivalent you attended that describes your training. The documentation must describe the scope, content, and duration of training in neuroanatomy, neurophysiology, neuropathology, pharmacology, psychopathology, physical modalities, and surgical modalities relevant to the field of pain medicine.
**Note:** Please contact the WIP Board of Examination office if you desire further instructions or a form for submission by the program director of the ACGME-accredited program or equivalent that you attended.

**Requirement 4
Ultrasound Training**

Documented confirmation of formal ultrasound in pain medicine training during residency or fellowship, or 20 Category-1 CME or equivalent credits in pain medicine or musculoskeletal ultrasonography in approved CME courses offered by:

1. World Academy of Pain Medicine Ultrasonography
2. American Society of Regional Anesthesia and Pain Medicine
3. European Society of Regional Anesthesia and Pain Medicine
4. Mayo Clinic MSK Course
5. American Academy of Pain Medicine
6. American Academy of Physical Medicine and Rehabilitation
7. International Society of Regional Anesthesia (ISURA)
8. International Society of Spinal and Paraspinal Sonography (ISSPS)
9. Ultrasound Application in Regional Anaesthesia and Pain, Innsbruck Medical University

**Requirement 5
Imaging Documentation**

Applicant must submit 10 ultrasound procedural images (should include all three components: musculoskeletal, peripheral nerves, spine) that must include data, applicant name, appropriate annotation and visible needle tip at the target. Images should not include patient identifiers.

**Requirement 6
Clinical Practice Experience**

By the date of the examination you apply for, you must have been engaged in the clinical practice of Pain Medicine for at least 12 months after completing a formal residency-training program.

A substantial amount of this practice must have been in the field of Pain Medicine. Time spent in a residency-training program does not satisfy this practice requirement; however, if you successfully completed a post-residency fellowship program in pain management that lasted 12 months or longer, you may count the fellowship as 12 months of practice in the field of Pain Medicine.

To be qualified to take the Examination in Ultrasound Interventional Techniques, your practice must either be devoted full-time to Pain Medicine or at least half of your practice must be devoted to Pain Medicine and the remainder to another specialty. To demonstrate the scope of your Pain Medicine practice, you must document your current practice in Pain Medicine. This documentation must include detailed descriptions of your day-to-day practice, including time and procedures allocated throughout your practice schedule. A summary of your overall practice, documenting specific evaluation, management and procedures in pain medicine, should be included in your description.
You also must provide the following information regarding your practice:

- Whether your license to practice your profession in any jurisdiction has ever been limited, suspended, revoked, denied, or subjected to probationary condition.

- Whether your clinical privileges at any hospital or healthcare institution have ever been limited, suspended, revoked, not renewed, or subject to probationary conditions.

- Whether your medical staff membership status has ever been limited, suspended, revoked, not renewed, or subject to probation.

- Whether you have ever been sanctioned for professional misconduct by any hospital, healthcare institution, or medical organization.

- Whether the U.S. Drug Enforcement Administration or your national, state, provincial, or territorial controlled substances authorization has ever been denied, revoked, suspended, restricted, voluntarily surrendered or not renewed.

- Whether you have ever voluntarily relinquished clinical privileges, controlled substance registration, license to practice or participating status with any health insurance plan, including government plans, in lieu of formal action.

- Whether you have ever been convicted of a felony relating to the practice of medicine or one that relates to health, safety, or patient welfare.

- Whether you presently have a physical or mental health condition that affects, or is likely to affect your professional practice.

- Whether you have or have had a substance abuse problem that affects or is reasonably likely to affect your professional practice.

- Whether there have been any malpractice judgments or settlements filed or settled against you in the last five years.

### Requirement 7
**Adherence to Ethical and Professional Standards**

Upon application, and any grant of certification, you agree that you adhere to all WIP requirements, agree to continue to adhere to these requirements, and agree that should you fail to do so, WIP and/or its Board of Examination may revoke or otherwise act upon your certification.

As a means of demonstrating your adherence to ethical and professional standards, you must submit a minimum of two (2) letters of recommendation from practicing physicians. The letters will be used to assess the applicant’s adherence to professional and ethical standards and to confirm information regarding the applicant’s Pain Medicine practice, including the assessment of whether the applicant has been satisfactorily practicing Pain Medicine and practicing this specialty on a full-time basis.
Note: Only one letter may be from a physician partner. The second letter must be from another physician who can speak to the applicant’s practice in Pain Medicine.

Note: Letters from relatives will not be considered.

Included with the application is a form detailing what must be included in the letter and to whom it should be addressed. Please provide this form to the recommending physicians so that the content of the letter is complete.

Requirement 8
Declaration and Consent

Please refer to the FIPP Examination Application for the declaration and consent.

The World Institute of Pain (WIP) was founded in 1994. It is incorporated in the State of California as a nonprofit corporation and operates as an autonomous entity, independent from any other association, society, or academy. This independence permits WIP to maintain integrity concerning its policy-making on matters related to certification.

The World Institute of Pain and its Board of Examination administers a psychometrically-developed and practice-related Interventional Examination in the field of Pain Medicine to qualified candidates. Physicians who have successfully completed the credentialing process and examination will be issued certificates of diploma in the field of Interventional Pain Medicine and designated as Fellows in the Interventional Techniques. A list of physicians certified will be available to medical organizations and other groups in the general public.

Mission
The mission of the World Institute of Pain – Board of Examination is to protect and inform the public by improving the quality and availability of Interventional Techniques in Pain Medicine.

Goals and Objectives
The following are the goals and objectives of the World Institute of Pain – Board of Examination

1. To evaluate candidates who voluntarily appear for examination and to certify as Certified Interventional Pain Sonologist those who are qualified. Objectives to meet this goal include:
   • Determination of whether candidates have received adequate preparation in accordance with the educational standards established by the World Institute of Pain.
   • Creation, maintenance and administration of comprehensive examinations to evaluate the knowledge and experience of such candidates.
   • Issuance of certificates to those candidates found qualified under the stated requirements of the World Institute of Pain.

2. To maintain and improve the quality of graduate medical education in the field of Pain Medicine by collaborating with related organizations. Objectives to meet this goal include:
• Maintenance of a registry for public information about the certification status of physicians certified in interventional techniques.
• Provision of information to the public and concerned entities about the rationale for certification in interventional examinations.
• Facilitation of discussion with the public, professional organizations, health care agencies and regulatory bodies regarding education, evaluation and certification of Pain Medicine specialists in interventional techniques.

INSTRUCTIONS
PLEASE READ ALL INSTRUCTIONS CAREFULLY BEFORE ENTERING ANY INFORMATION ON THE APPLICATION.
Applicants bear the sole responsibility for meeting all eligibility criteria, application deadlines, and submission requirements, as delineated in both the application and the Bulletin of Information.

Only applications that are received by the deadline and that are legible, clear, complete, and accurate will be reviewed by the Credentials Committee. This committee determines each applicant’s eligibility for certification.

Incomplete applications will not be reviewed. Once all information has been received at the World Institute of Pain office, it will be sent for review. Any delay may jeopardize the timely review of the application for the current certification cycle.

The application form and all supporting documents are to be mailed at one time in the same envelope. It is the applicant’s responsibility to keep personal copies of all submitted materials.

Applicants who want immediate acknowledgment of delivery should send materials via certified mail, return receipt requested, or via a national courier service.

After initial review of application materials, each candidate will receive a notice from the World Institute of Pain office indicating that the materials appear complete and will be forwarded to the Credentials Committee or that the materials are incomplete and require additional information.

Note: It is the responsibility of the applicant to notify the World Institute of Pain office immediately of any change in mailing address that takes effect during the certification process. Notification should be sent to: Board of Examination, World Institute of Pain, 145 Kimel Park Drive, Suite 310, Winston Salem, NC 27103, USA (mark.tolliver@worldinstituteofpain.org).

Your acknowledgment, examination details, and your examination results will be sent to the mailing address/e-mail you indicate on the application form.

If you rotate among clinics or hospitals, or if you have more than one office, please provide the telephone number where you will be most likely to receive a timely message. If possible, include the name of a contact person if you are not readily available.

Application Fee
The application fee of $2,500.00 must accompany all submitted materials. Payment must be in U.S. dollars via credit card, bank wire transfer, or in the form of a money order or cashiers check.
payable to the World Institute of Pain. Failure to submit the fee in the correct form will result in the rejection of your application. Applications will not be reviewed until payment in full has been received.

Refunds/Cancellations/Rescheduling

No refunds of the $2,500.00 application fee will be made, except when the Board of Examination determines that an applicant is not eligible to take the CIPS Examination. In this case, your application fee will be refunded less a $250.00 administrative fee.

If an applicant is unable to attend an exam after applying, they must notify the Certification Program Manager (mark.tolliver@worldinstituteofpain.org) AS SOON AS POSSIBLE, but no later than the application deadline for the exam in question (usually 4-6 weeks prior to the exam). The application fee will not be refunded, but the applicant will be allowed to participate in a later CIPS Examination, subject to an additional $100 rescheduling fee. All applicants MUST attend an exam within 2 years or 4 examinations (whichever is greater) of their original application; after this point the application fee will be forfeited and a new application must be submitted.

The Purpose of Certification

WIP Board of Examination is committed to the certification of qualified physicians in the field of Ultrasound in Pain Medicine who perform interventional techniques. The certification process employs practice-based requirements against which members of the profession may be assessed. The objectives of the WIP Board of Examination Certification Program in Interventional Techniques are as follows:

• To establish the knowledge and skills domain of the practice of Pain Medicine for certification.
• To assess the knowledge and application of ultrasound-guided interventional techniques of Pain Medicine physicians in a psychometrically valid manner.
• To encourage professional growth in the practice of interventional techniques.
• To formally recognize individuals who meet the requirements set forth by WIP Board of Examination.
• To serve the public by encouraging quality patient care in the practice of Pain Medicine.

Pain Medicine has emerged as a separate and distinguishable specialty that is characterized by a distinct body of knowledge and a well-defined scope of practice and is based on an infrastructure of scientific research and education. Competence in the practice of Pain Medicine requires advanced training in interventional techniques, experience, and knowledge. The interventional techniques are unique procedures performed by pain physicians, and appropriate examination and certification are designed to accurately reflect the quality of care given to pain patients. Specific expertise in musculoskeletal anatomy and ultrasound anatomy is required to demonstrate competency in ultrasound-guided interventional procedures. The WIP Board of Examination certification program has been designed to help recognize practitioners’ knowledge and skill in this field; however, certification by WIP cannot and is not intended to serve as a guarantee of competence.

Scope of Certification

The World Institute of Pain and its Board of Examination have developed the eligibility requirements and examination materials for the Examination in Interventional Ultrasound Techniques based on its review of the current state of medical and scientific knowledge about the treatment of pain, as documented in medical literature. The WIP Board of Examination and its
Examination Council have developed this certification program, which it believes recognizes currently accepted levels of knowledge and expertise in interventional techniques in order to improve patient care.

New developments are included in the examination only after practitioners of interventional pain management techniques have accepted them. Periodic practice analyses are conducted to ensure that the examination continues to reflect actual practice conditions.

WIP Board of Examination welcomes comments from the public and the profession designed to assist in improving this program.

Test Development and Administration
WIP Board of Examination retains Dr. Gerald Rosen of New York, New York and Herbert P. Bawden, Jr., MS, Southampton, Pennsylvania to provide assistance in the development of the annual certification examination. Dr. Rosen and Mr. Bawden specialize in the conceptualization, development, and implementation of professional certification programs.

ABOUT THE EXAMINATION
The Examination in Interventional Techniques is administered only in English (except for part 2B). It consists of three (3) parts. Part 1 is the Theoretical examination. Part 2A is the Practical Examination and Part 2B is the Oral Examination. For the Practical and Oral Examinations, candidates are evaluated by two examiners from a pool of examiners. Candidates may not be evaluated by examiners who are known intimately by the candidate.

PART 1 – THEORETICAL EXAMINATION
The theoretical examination consists of 100 four-option multiple-choice questions. Examinees have two hours to respond. The questions cover the following topics:

THEORETICAL EXAMINATION CONTENT OUTLINE

1. GENERAL KNOWLEDGE
   Knowledge of physics and principles of medical ultrasound
   Knowledge of musculoskeletal and spine anatomy
   Knowledge of ultrasound equipment and its handling
   Knowledge of patient safety during the procedures (sterility, preparation, equipment)
   Knowledge of the proper image documentation a

2. CHRONIC PAIN
   Excellent knowledge of the different chronic pain syndromes
   Excellent knowledge of the guidelines for the treatment of chronic pain
   Practical knowledge of taking the history and physical examination of the patient with chronic pain
   Competence in clinical reasoning and making a differential diagnosis and a treatment plan
   Excellent theoretical and practical knowledge of the pharmacological and interventional therapeutic pain modalities
   Knowledge of alternative treatment modalities (rehabilitation, neurosurgery, neurology, psychological interventions and physical therapy)
   Knowledge about the organization of a multidisciplinary pain treatment

3. SPINE PROCEDURES
   Cervical medial branch block
   Cervical selective nerve root block
   Thoracic medial branch/facet joint block
   Lumbar medial branch/facet joint block
   Lumbar selective nerve root block
   Subarachnoid injection
   Caudal epidural injection
   Sacroiliac joint injection
4. **PERIPHERAL AND AUTONOMIC NERVES**
   - Cervical sympathetic trunk
   - Suprascapular nerve
   - Ilioinguinal/iliohypogastric nerve
   - Greater occipital nerve
   - Median nerve at wrist
   - Ulnar nerve at cubital canal
   - Intercostal nerve
   - Saphenous nerve above knee
   - Tibial nerve at tarsal canal
   - Pudendal nerve

5. **MUSCULOSKELETAL**
   - AC joint

---

**PART 2A - PRACTICAL EXAMINATION**

In Part 2A, each examinee is required to perform three (3) procedures on a cadaver in forty-five (45) minutes in the presence of two (2) examiners. The candidate will have fifteen (15) minutes in which to perform each procedure, with the assistance of an ultrasound machine C-Arm, for a total of forty-five (45) minutes. Two examiners, with the assistance of an ultrasound machine, evaluate the techniques performed by the examinee on the cadaver. **Examinees are assigned one (1) procedure from each region.**

- **Spine**
  1. Cervical medial branch block
  2. Cervical selective nerve root block
  3. Thoracic medial branch/facet joint block
  4. Lumbar medial branch/facet joint block
  5. Lumbar selective nerve root block
  6. Subarachnoid injection
  7. Caudal epidural injection
  8. Sacroiliac joint injection

- **Peripheral nerves**
  1. Cervical sympathetic trunk
  2. Suprascapular nerve
  3. Ilioinguinal/iliohypogastric nerve
  4. Greater occipital nerve
  5. Median nerve at wrist
  6. Ulnar nerve at cubital canal
  7. Intercostal nerve
  8. Saphenous nerve above knee
  9. Tibial nerve at tarsal canal
  10. Pudendal nerve

- **MSK**
  1. AC joint
  2. Bicep tendon (peri)
  3. Glenohumeral Joint (any approach)
  4. Subdeltoid bursa
  5. Elbow joint
  6. Medial or lateral epicondylitis tendon sheath injection/fenestration
  7. First MCP joint (hand)
  8. Piriformis injection
  9. Hip joint injection
  10. Trochanteric bursa injection, Sub. G-Max, Medius and Minimus
  11. Knee joint injection
  12. Distal ITB peritendon injection
  13. Tibiotalar joint injection
  14. Subtalar joint injection
  15. First MTP injection (foot)

Each examiner awards a score for each procedure performed.

**Note:**
During this part of the examination, the examinee will have at his/her disposal a fresh cadaver, necessary instruments, and an ultrasound machine.

**PART 2B- ORAL EXAMINATION**

In Part 2B, each examinee is individually questioned by two (2) examiners on two separate cases (medical vignettes to assess clinical reasoning). The examinees spend up to fifteen (15) minutes on each of the two cases for a total of thirty (30) minutes.

For each of the cases, the examinee has a maximum of five (5) minutes to review a short case history. One of the examiners asks the examinee for a diagnosis and the interventional procedure that should be performed. The examiner also asks a series of up to ten (10) questions that relate to the care and treatment of the patient. This portion of the examination lasts for up to fifteen (15) minutes. The second examiner follows the same procedure with the second case. This portion of the examination also lasts for up to fifteen (15) minutes. Both examiners award a score for each case based on the examinee’s diagnosis, suggested interventional procedure and answers to the questions posed.

**ORAL EXAMINATION CONTENT OUTLINE**

The oral cases/medical vignettes will be drawn from among the following topics:

1. Peripheral Nerve Injury  
2. Headache  
3. Cervical radicular pain  
4. Cervical Facet pain  
5. Occipital neuralgia  
6. Shoulder pain  
7. Thoracic pain  
8. Lumbosacral radicular pain  
9. Lumbar facet pain  
10. Sacroiliac joint pain  
11. Knee Pain  
12. Hip Pain  
13. Carpal Tunnel Syndrome  
14. Meralgia Paresthetica  
15. Foot Pain  
16. Musculoskeletal Pain and Disability

The WIP Board of Examination Certification Examination will be administered at locations announced on the WIP webpage ([http://worldinstituteofpain.org](http://worldinstituteofpain.org)). The organization reserves the right to change the examination site, city and date based on logistical or other concerns.

**Nondiscrimination Policy**

WIP does not discriminate against any person on the basis of age, gender, sexual orientation, race, religion, national origin, medical condition, physical disability, or marital status.

**Applying to Take the Examination**

You must complete the online application form available at [http://bit.ly/fippapp](http://bit.ly/fippapp) and submit all required documentation to apply for the examination.

It is very important that your application form be completed carefully and accurately. The information you provide in the application and any accompanying required documents will be used by the WIP Board of Examination to determine your eligibility to sit for the examination.

**Identification of Examinees During Scoring**

During the post-examination evaluation of examinee scores on the three parts of the CIPS examination and any subsequent discussions regarding the scores of individual examinees, all candidates are identified by numbers only. No names accompany these numbers.
Examination and Scoring Report

Approximately eight (8) weeks after the administration of the examination, your examination results will be e-mailed to you. Results will be sent to you by e-mail only and will not be released via telephone or facsimile.

Passing candidates will receive a letter informing them that they have passed the examination. The examination is designed to assess knowledge associated with minimal professional competency. It is not intended to distinguish among scores at or above the passing point; therefore, WIP will not report numeric scores for passing candidates.

WIP will send failing candidates notice of their score, the minimum passing score and a diagnostic report showing performance on each of the three parts of the examination. WIP does not limit the number of times candidates may apply for and take the examination. However, a candidate who fails the examination three (3) times is required to complete a minimum of one (1) additional year of practice before being eligible to reapply for the examination. A new application form and all applicable fees and required documentation must be submitted each time reexamination is requested.

Note: All answer sheets and scoring documents will be destroyed six (6) months after administration of the examination.

Appeals

A candidate who fails the examination and wishes to challenge the results may request that the examination be re-scored by hand to verify reported scores. A request must be submitted in writing within twenty (20) calendar days of the postmark on the score report along with a check for $50.00 (USD) payable to World Institute of Pain to cover the cost of hand scoring the examination. Results of hand scoring will be considered the final examination result. WIP offers no further appeal.

Certification

Candidates who pass the examination will receive a certificate suitable for framing and may identify themselves as Certified Interventional Pain Sonologist (CIPS). Each candidate who passes the examination shall be required to sign a license to use any name or acronym for the certification offered by the WIP and agrees not to use the certification in such a manner as to bring the WIP or its Board of Examination into disrepute (including the failure to maintain competent practice) and not to make any statement regarding the certification that the WIP or its Board of Examination may consider misleading or unauthorized. The certificate remains the property of WIP and must be surrendered to WIP in the case of termination of certification.

Re-certification

Certificates awarded by WIP and its Board of Examination are time-limited. WIP and its Board of Examination are in the process of establishing a re-certification policy. The WIP Board of Examination has this requirement to ensure that its certificants continue to meet the knowledge and skill required of a Pain Medicine physician board-certified in interventional techniques.

Examination Preparation

1. You should review the examination outline in this Bulletin of Information.
2. Answer the sample questions in this *Bulletin of Information* to familiarize yourself with the nature and format of the questions that will appear on the examination.

3. Refer to the list of references at the end of this *Bulletin of Information*.

**Registration for the Examination**

The WIP Board of Examination Credentials Committee reviews all applications submitted for the examination.

The review process takes approximately four (4) weeks. The review process does not start until ALL required materials are received from the applicant.

If your application is approved, you will receive an e-mail confirming your eligibility, and containing specific information about the date, time, and location of the examination.

**EACH CANDIDATE IS REQUIRED TO PRESENT A PHOTO ID AT THE REGISTRATION DESK ON THE DAY OF THE EXAMINATION.**

The Board of Examination independently verifies the information submitted in applications. State agencies or other licensing bodies sometimes take time to respond to verification requests. The Board of Examination is not responsible if these agencies do not reply in a timely fashion.

**Taking the Examination**

Strict security measures are maintained throughout all phases of examination development and administration. All candidates will be required to present some form of photo identification in order to enter the testing center.

Trained proctors will supervise the administration of the examination, maintaining the strictest security throughout the testing period.

Irregularities observed during the testing period, including but not limited to creating a disturbance, giving or receiving unauthorized information or aid to or from other persons, or attempting to remove test materials or notes from the testing room, may be sufficient cause to terminate examinee participation in the examination administration or to invalidate scores. Irregularities may also be evidenced by subsequent statistical analysis of testing materials.

The Board of Examination reserves the right to investigate each incident of suspected misconduct or irregularity.

**Test Site Regulations**

1. **All examinees must present some form of photo identification** (e.g., passport or driver’s license) at the test site in order to be allowed to take the examination. **No exceptions to this requirement will be made.**
2. Examinees must arrive at the test site approximately forty-five (45) minutes prior to the scheduled testing start time. Late arrivals will not be admitted to the test site.
3. The use of cellular phones, pagers and other electronic devices is **NOT** permitted.
4. Devices with memory capabilities, books, paper, and notes are not permitted in the testing room.
5. Food (including candy and gum), beverages and tobacco products are not permitted in the testing room.
6. Unauthorized visitors are not allowed at the test site. Observers approved by the Board of Examination Executive Board may, however, be present during the testing session.
7. Examinees may leave the testing room to use the restroom, but will not receive any additional or compensating time to complete the examination.

**Determination of Passing Score**
The passing score is based on an expected level of knowledge; it is not related to the distribution of scores obtained during a particular administration. At any given administration of the CIPS Examination, an examinee has the same chance of passing the examination regardless of whether the group taking the examination at that time tends to have high scores or low scores.

**EXAMPLES OF MULTIPLE CHOICE QUESTIONS**

1. The structures encompassed by the dotted circles in the coronal ultrasound scan of the spine below are:
   A. cervical medial branch nerves.
   B. lumbar facet joints.
   C. lumbar medial branch nerves.
   D. cervical facet joints.

   ![Coronal ultrasound scan of the spine]

   Correct answer: A

2. After the needle has been placed for a lumbar facet nerve block, the next step is:
   A. Injection of local anesthetic.
   B. Placement of transducer into long-axis view to localize transverse process.
   C. Placement of transducer into long-axis view to localize pedicle.
   D. Injection of saline to visualize the injectate spread.

   Correct answer: B. Greher et al. Anesthesiology 2004

3. According to current literature, what is the technical success rate for facet joint injection?
   A. 21-40%
   B. 41-60%
   C. 61-80%
   D. 81-100%

4. Which of the following is true of the ultrasound-guided lumbar selective nerve root block technique?
   A. Out of plane approach has been described
   B. Technical success rate of approximately 90% has been reported
   C. The incidence of intravascular injection is slightly higher in reports using ultrasound guided needle placement
   D. Nerve stimulator should routinely supplement ultrasound-guided needle placement

5. The MOST common complication of a paravertebral block is:
   A) pneumothorax.
   B) hypotension.
   C) vascular puncture.
   D) Epidural or intrathecal spread.

Answer: C Inadvertent vascular puncture is the most common complication of paravertebral blocks. Naja et al Anesthesia 2001

6. Thoracic facet injections have been described using ultrasound guidance in the:
   A) sagittal plane with a caudal to cephalic needle approach with the needle in-plane.
   B) parasagittal oblique plane with caudal to cephalic needle approach with the needle in-plane.
   C) sagittal plane with a caudal to cephalic needle approach with the needle out-of-plane.
   D) parasagittal oblique plane with caudal to cephalic needle approach with the needle out-of-plane.

Answer: A Thoracic facet injections under ultrasound have only been described in the sagittal plane with the needle in-plane. Stulic et al Journal of US in Medicine 2011.

7. Which of the following muscles is innervated by the suprascapular nerve?
   A. Infraspinatus
   B. Subscapularis
   C. Teres minor
   D. Deltoid

Answer: A

8. Which artery lies close to the ilioinguinal nerve?
   A. Branch of the superior ilioinguinal artery
   B. Gastric epiploic artery
   C. Branch of the deep circumflex iliac artery
   D. Iliohypogastric artery
9. Which of the following BEST describes the LFCN classic appearance and location where it is MOST easily found?
   A. Hyperechoic dot over the sartorius muscle under the fascia lata
   B. “Cat’s eye” with hyperechoic center surrounded by hypoechoic fat pad over the sartorius muscle
   C. Honeycombed structure medial to ASIS in inguinal ligament
   D. Hyperechoic mass over lateral thigh superficially to the tensor fascia lata

Answer: B

10. The median nerve provides innervation to which of the following EXCEPT?
    A. Opponens pollicis
    B. Abductor pollicis brevis
    C. First and second lumbricals of the hand
    D. Abductor pollicis longus

Answer: D

11. Which accessory muscle present in the cubital tunnel can compress the ulnar nerve?
    A. Biceps femoris
    B. Triceps brachii
    C. Biceps brachii
    D. Anconeus epitrochlearis

Answer: D

12. The ulnar nerve can be visualized at all of the following locations EXCEPT:
    A. at Guyon’s canal at the wrist.
    B. at the lateral epicondyle of the elbow.
    C. between the axillary artery and vein, in most cases.
    D. along the anterior surface of the medial head of the triceps.

Answer: B

13. Where can the pudendal nerve be readily found?
    A. In the sacral plexus under piriformis
    B. Within the inferior gemellus muscle
    C. Under the ischial spine
    D. Medial to the ischial spine

Answer: D

14. Electrical stimulation of the pudendal nerve will activate which of the following muscles?
    A. Obturator internus
B. internal urethral sphincter  
C. Internal anal sphincter  
D. Levator ani and coccygeus

Answer: D

15. Where is the stellate ganglion located?
   A. Anterior to Chassaignac’s Tubercle
